Climate Change: The Antarctic

Today at 11:15am in the Art Gallery

Chuck Dayton traveled by ship to the Falkland Islands, South Georgia Island and the Antarctic Peninsula last November. The polar regions are warming faster than anywhere on earth, and Chuck will discuss the signs and implications of climate change for the Antarctic. The sea level rise and ice shelf break up result in loss of the food supply of krill, impacting wildlife including penguins and whales while changing deep ocean currents worldwide. He will also share his photos of huge penguin rookeries, elephant seals, whales, and the rugged, ice-bound and mountainous terrain of these very special places.

Dignity Center Success Story

It is truly wonderful when someone, through their hard work at the Dignity Center, finally gets housing! Here are the thoughts of a Dignity Center 'Graduate':

"The Dignity Center has been a blessing for me. The Advocates and Volunteers here have supported me and shown me that there was light during a very dark place in my life. What it means to have my own place is awesome! I get a sense of being independent again. I can relax more — don't have to worry about being homeless. I can concentrate more on having a better life style, taking a shower, preparing my own food ... knowing the responsibility and being stable enough to look forward to a better life. I truly thank the Dignity Center and Staff for their support. Thank you all!" -Lance
